New NovaBACKUP 10 Released

The launch of NovaBACKUP 10 offers best practices in data protection with local and online backup in one box.

This latest version of NovaBACKUP empowers users with the choice to backup and store critical data locally or online, and includes up to 10GB of free online storage for one year. Now with off-site backup capabilities, users can use local protection for personal data while sending critical business information via FTP to centralized corporate storage or store it on the Internet with Amazon S3 or NovaStor storage partner, Digi-Data.

NovaBACKUP 10 is the first all in one solution from a major data protection software provider to offer this level of flexibility in protecting user's critical information wherever they are, to virtually any backup device, simply and reliably.

Features new to NovaBACKUP 10 include disk imaging disaster recovery, which takes a snapshot of the entire system to protect and preserve data in the event of a disaster allowing recovery from a local or network source; and the ability to backup, copy or mirror data to FTP servers or online.

Offered in 3 editions to meet your business needs: Professional, Server and Business Essentials.

NovaBACKUP Upgrade Information You Need to Know

This release is free to all valid NovaBACKUP Maintenance Agreement holders and those who purchased in the 60 days prior to the release.

Simply [log in](#) to your NovaStor account and click the "Maintenance Agreements & Upgrades" link on the left hand column, you will see upgrade instructions guiding you through the store process (be sure to enter your new serial number after installing the new version).

If your version of NovaBACKUP is not covered under a valid maintenance agreement or by our free upgrade policy, don't worry - you can still get NovaBACKUP 10 at a great price.

Visit NovaStor at the HP Technology Forum

NovaStor is pleased to announce that we will be exhibiting at the HP Technology Forum & Expo in Las Vegas, June 16 - 19, 2008.

NovaStor has a long standing relationship with HP to help service strategic accounts with special data protection needs. NovaStor's capabilities range from single workstation backup to large enterprise data protection and retention, as well as local and online backup to insure data availability.

The HP Technology Forum & Expo is being held in Las Vegas, Nevada at the Mandalay Bay Hotel and Casino.

Attendees are welcome to stop by booth 806 to learn more about best practices in data protection.
